LM18RP - S35 BELT

Ski & Snowboard sand belt machine

Equipped with a two speed belt which gives excellent preparation and finish.

The variable speed automatic feed makes for easy working of skis and snowboards and can be disconnected to allow skis or snowboards to be worked by hand.

The double supporting roller on the inline edge sharpening unit provides a firm base for edge sharpening. The roller can be adjusted to various edge angles.

Characteristics:

- 1-Very versatile machines.
- 2-Simple to use.
- 3-Top quality working for ski and snowboard.
- 4-Compact dimensions.
